Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone:
(1-613-951-3350) or to the Statistics Canada reference centre in:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)
Ottawa	(1-613-951-8116)	Calgary	(1-403-292-6717)
Toronto	(1-416-973-6586)	Vancouver	(1-604-666-3691)
Winnipeg	(1-204-983-4020)		

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou
au centre de consultation de Statistique Canada à:

Halifax	(1-902-426-5331)	Regina	(1-306-780-5405)
Montréal	(1-514-283-5725)	Edmonton	(1-403-495-3027)

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Industrial Product Price Index

According to preliminary figures, the year-over-year change in manufacturers' prices edged up in July, reaching 6.2% from June's revised level of 6.1%. This rate of change, which has been rising since January, reached its highest level since July 1982. The month-to-month increase was 0.3%.

Inflationary pressure continued to come almost entirely from intermediate goods, particularly first-stage intermediate goods. The year-over-year change in producer prices in Canada remained appreciably higher than in the other G7 countries.

Price increases in July were widespread. Manufacturers saw prices rise in 14 major product groups, and decline in three. The most significant price increases were for primary metal products, pulp, and petroleum and coal products. Two important price declines were for lumber, sawmill and other wood products and for transportation equipment.

Metals, pulp and petroleum products

The July increase in primary metal prices (+1.7%) was mainly due to increases for aluminum products (+4.7%) supported by increases for steel (+0.9%) and for copper and copper alloy products (+1.7%). The increases in aluminum prices were apparently due to pledged voluntary production cuts by world producers. The strength in copper prices may be due to rising world demand for copper as the recovery continues. Prices for primary steel products have been rising slowly since August 1993. The most recent round of increases reflects the continued economic recovery in North America, particularly the buoyant auto industry.

Pulp prices were up 3.1% in July, principally due to the increase in the export price for sulphate woodpulp. Export prices for sulphate woodpulp rose 4.1%, after accounting for a 0.8% decline in the value of the U.S. dollar against the Canadian dollar. There is strong upward pressure on U.S. pulp prices as demand remains strong while pulp inventories have been depleted.

Gasoline and fuel oil prices rose 1.9% from June while prices for other petroleum and coal products were up 0.3%. Gasoline and fuel oil prices have been increasing since January 1994 (+14.3%). Prices have generally recovered to levels recorded at the end of 1992.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoires, la variation d'une année à l'autre des prix des fabricants se redresse en juillet pour atteindre 6,2%, comparativement au niveau révisé de 6,1% de juin. Ce taux de variation, qui augmente depuis janvier, est à son niveau le plus élevé depuis juillet 1982. La variation d'un mois à l'autre est de 0,3%.

Les pressions inflationnistes continuent de provenir presque uniquement du secteur des produits semi-finis, en particulier des produits semi-finis de première étape. La variation d'une année à l'autre des prix à la production au Canada continue d'être sensiblement supérieure à celle des autres pays membres du G-7.

Les hausses des prix en juillet sont généralisées. Les prix de quatorze des principaux groupes de la fabrication sont à la hausse, et trois à la baisse. Les augmentations de prix les plus appréciables s'observent dans le cas des produits métalliques primaires, de la pâte de bois et des produits du pétrole et du charbon. Il y a deux importantes baisses de prix, l'une pour les sciages, produits de scierie et divers, et l'autre, pour le matériel de transport.

Métaux, pâte de bois et produits du pétrole

L'augmentation du prix des métaux primaires (+1,7%) en juillet s'explique principalement par celle des produits de l'aluminium (+4,7%), à laquelle s'ajoute celle de l'acier (+0,9%) et des produits du cuivre et alliages de cuivre (+1,7%). L'accroissement du prix de l'aluminium est apparemment le résultat des réductions volontaires de production convenues par les producteurs mondiaux. La vigueur du prix du cuivre semble s'expliquer par la hausse de la demande mondiale de ce métal à mesure que la reprise se poursuit. Le prix des produits de l'acier de première transformation augmente lentement depuis août 1993. Cette dernière série d'augmentations traduit la poursuite de la reprise économique en Amérique du Nord, en particulier la prospérité du secteur de l'automobile.

Le prix de la pâte de bois augmente de 3,1% en juillet. Cette majoration est le résultat principalement de la hausse du prix à l'exportation de la pâte de bois au sulfate. Ce dernier en effet s'est accru de 4,1%, suite à la baisse de 0,8% de la valeur du dollar américain par rapport au dollar canadien. Il existe une forte pression à la hausse sur les prix de la pâte de bois américaine, car la demande reste vigoureuse tandis que les stocks sont réduits.

Les prix de l'essence et du mazout augmentent de 1,9% par rapport à juin, tandis que ceux des autres produits du pétrole et du charbon progressent de 0,3%. Les prix de l'essence et du mazout s'accroissent depuis janvier 1994, augmentant en tout de 14,3%. Le niveau des prix se retrouve à peu près à celui de la fin de 1992.

Lumber and cars

After recovering in May and June, prices for lumber, sawmill, and other wood products dropped 1.2% in July. Prices for lumber declined except on the coast of British Columbia, where they edged up 0.8%. Declines ranged from 0.6% in the Atlantic provinces, to 5.7% on the Prairies. Continuing price increases by some companies for western red cedar buoyed the price level in coastal British Columbia.

Despite slight rises in domestic prices for autos (+0.1%) and trucks (+0.2%), their export prices dropped 0.7% and 0.8% respectively as the value of the Canadian dollar rose. These declines were primarily responsible for the drop in transport equipment prices.

Inflationary pressures

Apart from petroleum products, inflationary pressures in July continued to come primarily from pulp and non-ferrous metals. Consequently, the overall effect on the Canadian economy continues to be an improved profit picture for exporting Canadian manufacturers but relatively little upward pressure on the consumer price index. Continued increases in first-stage intermediate products may soon begin to stimulate increases in various other intermediate goods prices.

Intermediate goods

Although both first-stage and second-stage intermediate goods contributed to the inflationary pressure on manufacturers' prices, pressure came primarily from first-stage intermediate goods.

For the first-stage intermediate category of goods, inflationary pressure came mainly from pulp and from primary non-ferrous metal products. Overall, the year-over-year change in prices for first-stage intermediate goods jumped to 16.1% in July. This was the largest year-over-year increase since September 1988. Although prices for first-stage intermediate goods have been rising for the last eight months, they have only regained their level of the end of 1990.

The second-stage intermediate goods category saw the year-over-year price change edge up to 5.9% from 5.7% in June. Price increases in the gasoline and fuel oil industry had the greatest impact.

Finished goods

In July, the overall price level for finished goods remained unchanged. The year-over-year price change remained at 3.6%. A slight increase in the inflationary pressure from food and feed prices was offset by declines in the year-over-year change in the prices for capital equipment and other finished goods.

Sciages et voitures

Après s'être redressé en mai et en juin, le prix des sciages, produits de scierie et autres produits du bois baisse de 1,2% en juillet. Le prix des sciages baisse pour toutes les régions, sauf la côte de la Colombie-Britannique, où il augmente de 0,8%. Les diminutions sont variées entre 0,6% dans les provinces de l'Atlantique, et 5,7% dans les Prairies. Certaines compagnies continuent de relever le prix du cèdre rouge de l'Ouest, augmentant le niveau des prix sur la côte de la Colombie-Britannique.

En dépit d'une légère hausse du prix intérieur des voitures (+0,1%) et des camions (+0,2%), leurs prix à l'exportation diminuent respectivement de 0,7% et de 0,8% en raison de la remontée du dollar canadien. Ces diminutions sont essentiellement responsables pour la chute du prix du matériel de transport.

Pressions inflationnistes

En plus des produits du pétrole, les pressions inflationnistes en juillet continuent de provenir principalement de la pâte de bois et des métaux non ferreux. L'effet général sur l'économie canadienne est toujours une amélioration des bénéfices pour les fabricants orientés vers l'exportation, mais peu de pression à la hausse sur l'indice des prix à la consommation. Néanmoins, les hausses continues du prix des produits semi-finis de première étape pourraient bientôt commencer à susciter des augmentations du prix de divers autres produits semi-finis.

Produits semi-finis

Même si les produits semi-finis de première et de deuxième étape ont contribué aux pressions inflationnistes sur les prix des fabricants, la pression parvient principalement des produits semi-finis de première étape.

Dans cette dernière catégorie de produits, ce sont la pâte de bois et les produits des métaux non ferreux de première transformation qui sont les principales causes des pressions inflationnistes. Globalement, la variation d'une année à l'autre des prix des produits semi-finis de première étape augmente pour atteindre 16,1% en juillet. C'est la plus forte augmentation d'une année à l'autre depuis septembre 1988. Néanmoins, même si les prix des produits semi-finis de première étape sont à la hausse depuis huit mois, ils ne se retrouvent encore qu'à leur niveau de la fin de 1990.

La variation des prix d'une année à l'autre des produits semi-finis de deuxième étape passe de 5,7% à 5,9%. C'est la hausse des prix dans l'industrie de l'essence et du mazout qui exerce la pression la plus forte.

Produits finis

En juillet, le niveau général des prix des produits finis reste inchangé. Le taux de variation d'une année à l'autre demeure à 3,6%. Une légère augmentation de la pression inflationniste de la part des prix des aliments de consommation et des aliments pour animaux est neutralisée par la diminution de la variation d'une année à l'autre du prix du matériel capitalisé et des autres produits finis.

The year-over-year change in prices for foods and feeds rose from 1.5% to 1.9%. The year-over-year change in capital equipment prices declined from 4.8% to 4.5%, while the year-over-year change in other finished goods prices declined from 4.2% to 4.0%. These declines were largely caused by a decline in prices for exported motor vehicles.

La variation d'une année à l'autre du prix des aliments de consommation et des aliments pour animaux passe de 1,5% à 1,9%. La variation d'une année à l'autre du prix du matériel capitalisé tombe de 4,8% à 4,5%, alors que celle du prix des autres produits finis passe de 4,2% à 4,0%. Ces diminutions s'expliquent principalement par la baisse du prix des véhicules automobiles exportés.

Highlights

Raw Materials Price Index

Based on preliminary data, the Raw Materials Price index (RMPI, 1986 = 100) rose 1.0% from June to July, the seventh consecutive increase and the smallest rise since March. Over the last 12 months, prices have risen 10.7%, nearly all of it in 1994. Crude oil and non-ferrous metals led July's increase although other increases were widespread. Only vegetable product prices, mainly grain prices, dropped in July.

Crude oil prices rose 3.2% in July, the seventh consecutive increase. On a year-over-year basis the increase was 21.1%. Crude oil prices have now reached their highest level since the end of the Gulf War in February 1991.

In July, non-ferrous metal prices rose 3.0%. This component also reported the highest year-over-year increase at 28.6%. Metals within this area have risen steadily since January, most notably copper concentrates and aluminum materials.

Also, ferrous material prices edged up (+1.8%), the result of price increases in iron and steel scrap (+4.4%) which reversed the downward movement of the past two months. Prices for iron and steel scrap appear to be rising as a result of a very tight market. In addition, the larger integrated and smaller non-integrated steel producers, as well as offshore purchasers, are competing for available material.

Prices for vegetable products in July fell 5.7%, the first decline since September 1993. Canola, wheat, corn and barley were the main contributors to this decline, although other grains and unrefined sugar also reported price decreases. Canola prices plummeted 21.0% after increasing some 60.0% since last October. The July decline in grain prices (-9.0%) was mostly attributable to favourable growing conditions which eased concern over tight grain supplies.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) a augmenté de 1,0% entre juin et juillet. Les prix ont augmenté chaque mois depuis janvier. La hausse de juillet est en fait la plus faible depuis mars. Au cours des douze derniers mois, la hausse des prix atteint 10,7%, dont la quasi-totalité en 1994. Ce sont les prix du pétrole brut et des métaux non ferreux qui augmentent le plus, mais on observe des majorations dans d'autres secteurs. Les prix des produits d'origine végétale sont les seuls à diminuer en juillet.

Les prix du pétrole brut augmentent de 3,2% entre juin et juillet. C'est la septième hausse consécutive et l'augmentation d'une année à l'autre s'établit à 21,1%. Les prix du pétrole brut atteignent ainsi leur niveau le plus élevé depuis la fin de la guerre dans le Golfe persique (février 1991).

En juillet, les prix des métaux non ferreux augmentent de 3,0%. Cette composante de l'indice des prix des matières brutes enregistre également la plus forte hausse d'une année à l'autre (+28,6%). Les métaux de cette catégorie ont augmenté de façon soutenue depuis le mois de janvier, les hausses les plus fortes s'observant dans le cas des concentrés de cuivre et des matériaux en aluminium.

Également, les prix des métaux ferreux s'accroissent de 1,8%, en raison de la progression du prix des déchets de fer et d'acier (+4,4%), qui renversent le mouvement à la baisse des deux derniers mois. Les prix des déchets de fer et d'acier semblent augmenter en raison d'un marché très serré, où les grands producteurs d'acier intégrés et plus petits non intégrés, de même que les acheteurs outre-mer se font la concurrence pour tous les stocks disponibles.

Les prix des produits d'origine végétale diminuent de 5,7% en juillet, ce qui en fait la première baisse depuis septembre 1993. Les principales causes de cette baisse sont le canola, le blé, le maïs et l'orge, quoique les prix de certaines autres céréales et du sucre non raffiné baissent eux aussi. Le prix du canola chutent de 21,0% en juillet après s'être accru de quelque 60,0% depuis octobre de l'an dernier. La baisse de 9,0% du prix des céréales en juillet s'explique principalement par les bonnes conditions de culture, qui devaient faire disparaître les inquiétudes entourant le resserrement des approvisionnements de céréales.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

 TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits
 1986 = 100

					Month - Mois												Annual average - Moyenne annuelle	
					Jan. - Janv.	Feb. - Fév.	March - Mars	April - Avril	May - Mai	June - Juin	July - Juill.	Aug. - Août	Sept.	Oct.	Nov.	Dec. - Déc.		
Other general purpose mach. & equip. - Autres machines et matériel, d'usage commun					1990	115.7	116.3	116.2	116.7	116.7	116.7	116.7	116.6	116.8	117.4	117.6	117.8	116.8
					1991	118.8	119.0	119.1	119.1	119.4	119.7	119.8	120.0	119.8	119.8	120.0	120.2	119.6
					1992	121.0	121.2	121.3	121.6	121.8	122.1	122.1	122.4	123.1	123.4	123.5	122.1	
					1993	123.6	123.9	124.7	124.9	125.0	125.3	125.6	125.8	125.8	126.1	125.9	126.2	125.2
D 692000	22 54 06	95%	B	1994	126.6	126.8	127.2	127.5	127.7	127.8	128.1							
Metal end products, n.e.s. - Autres produits finis en métal					1990	96.9	98.7	97.5	97.5	98.2	97.8	97.5	97.2	97.7	97.4	97.8	97.7	97.7
					1991	97.4	97.8	97.8	97.1	96.7	96.4	96.6	97.8	97.5	97.2	97.3	97.8	97.3
					1992	97.7	99.1	99.6	98.8	99.8	99.4	97.9	99.0	100.4	101.0	101.6		99.4
					1993	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6	101.6
D 692002	22 54 06 4699	E	C	1994	101.6	101.6	101.6	101.6	101.6	102.0	102.0							
Ball bearings, roller bearings - Roulements à billes et à rouleaux					1990	109.0	110.6	109.6	109.1	109.7	109.4	108.9	108.4	109.1	108.7	109.0	108.9	109.2
					1991	108.5	108.9	108.9	109.6	109.6	109.2	109.4	109.2	108.9	108.5	108.6	108.7	109.0
					1992	109.3	110.9	112.9	112.1	113.3	112.8	112.8	112.8	117.3	119.0	119.8	120.5	114.5
					1993	120.6	119.0	120.9	121.6	122.3	122.9	123.1	124.8	124.7	125.7	125.5	126.1	123.1
D 692003	22 54 06 5042	E	C	1994	126.3	128.1	131.0	134.7	134.3	134.9	134.3							
Hydraulic power transm. equip. - Matériel de transmission de puissance hydraulique					1990	118.5	118.7	118.7	118.8	118.7	118.7	118.7	118.7	118.7	118.5	118.5	121.8	118.9
					1991	121.8	121.8	121.8	122.1	122.1	122.1	122.1	122.1	122.1	122.4	122.4	122.4	122.1
					1992	128.6	128.8	128.8	128.8	128.8	128.8	128.8	128.8	128.8	128.8	128.8	128.8	128.8
					1993	128.8	129.3	129.3	129.3	129.3	133.9	133.9	133.9	133.9	133.9	133.9	133.9	131.9

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

- (1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
- ss indicates the S-level commodity code (from 9 to 28)
 - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 - nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.
 - pppp indicates the PCG code (except for some special aggregations which include several PCGs).
 - rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

- (1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

- ss indique le code du niveau S des produits (de 9 à 28)
- mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
- nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
- pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
- rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing
TABLEAU 4. Indices des prix des produits industriels par étape de transformation

1986 = 100

(1) Monthly prices are collected and processed three times per annum.

(1) Des prix mensuels sont relevés et calculés trois fois par année.

(2) Indexes for the current year and previous year are subject to revision.

(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Robin Lowe (613-951-3370), or Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec la Sous-section de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Robin Lowe (613-951-3370) ou Bernard Lupien (613-951-9605).

THE 1994 CANADA YEAR BOOK

*Your indispensable and
comprehensive reference
source on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives

250 concise tables plus 63 charts and graphs that put statistical information into focus

Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers

Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

L'ANNUAIRE DU CANADA 1994

*Un ouvrage complet et
indispensable sur le Canada*

Pour obtenir des renseignements essentiels sur le Canada, consultez *l'Annuaire du Canada*. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

L'Annuaire du Canada 1994 étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

Voici ce que vous trouverez dans l'édition de 1994 :

Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne

250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique

Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres

Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, *l'Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

COMMANDEZ DÈS AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

Vous pouvez vous procurer la version française ou anglaise de *l'Annuaire du Canada 1994* (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, Ottawa (Ontario) K1A 0T6, ou communiquez avec le centre de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous le préférez, télécopiez votre commande en signalant le 1-613-951-1584 ou téléphonez sans frais au 1-800-267-6677 et portez les frais à votre compte VISA ou MasterCard.

FIND OUT THE INSIDE STORY ON 25% OF THE LABOUR FORCE

Order your copy of **Public Sector Employment and Remuneration** today!

Uncovering the latest labour changes in the public sector can be tough. But now there's a publication to help.

Public Sector Employment and Remuneration 1992, (With Historical Data from 1988) gives you reliable data, consistent comparisons, and concise analysis on the changing levels of public sector employment.

This publication brings you all the facts! **Public Sector Employment and Remuneration 1992** provides you with the most up-to-date public sector employment statistics, including for the first time, FULL COVERAGE OF THE PUBLIC SECTOR and new **CENSUS METROPOLITAN AREA DATA** for federal and local governments.

This valuable working tool will help you to:

- Chart changes in public sector employment: nationally, provincially and locally.
- Make direct comparisons between employment levels: federal, provincial, inter-provincial, and municipal.

Don't miss this opportunity to get the information you need to understand where we are and make informed decisions about public sector employment strategies for the '90s.

Each copy of **Public Sector Employment and Remuneration** (Catalogue no. 72-2090XPB) costs only \$42 in Canada (plus GST), US\$51 in the United States and US\$59 in other countries.

To order, write to **Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6**, or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, call toll-free **1-800-267-6677** and use your VISA or MasterCard. Or fax your order to **(613) 951-1584**.

DÉCOUVREZ LES FAITS RÉELS QUI TOUCHENT 25 % DE LA POPULATION ACTIVE

Commandez dès aujourd'hui votre exemplaire d'**Emploi et rémunération dans le secteur public**.

Il est parfois difficile de se tenir informé des derniers développements survenus dans le dossier de l'emploi. Heureusement, il existe maintenant une nouvelle publication pour combler cette lacune.

Emploi et rémunération dans le secteur public en 1992, (Avec les données historiques de 1988) fournit des données fiables, des comparaisons pertinentes et des analyses concises sur l'évolution du niveau d'emploi dans le secteur public.

Cette publication est une source de données factuelles. **Emploi et rémunération dans le secteur public en 1992** vous offre les statistiques les plus récentes sur l'emploi

dans le secteur public et, pour la première fois, UNE COUVERTURE COMPLÈTE DU SECTEUR PUBLIC et les nouvelles **DONNÉES SUR LES RÉGIONS MÉTROPOLITAINES DE RECENSEMENT** pour les administrations fédérale et locales.

Cet ouvrage de référence inestimable vous aidera à :

- représenter graphiquement l'emploi total dans le secteur public, à l'échelle nationale, provinciale et locale;
- établir des comparaisons directes entre les niveaux d'emploi dans les administrations fédérale, provinciales, interprovinciales et municipales.

Ne ratez pas l'occasion d'en savoir davantage sur la situation actuelle de l'emploi afin de pouvoir prendre des décisions éclairées sur les stratégies d'emploi à adopter pour le secteur public dans les années 1990.

Emploi et rémunération dans le secteur public en 1992 (n° 72-2090XPB au catalogue) est vendu seulement 42 \$ l'exemplaire au Canada (TPS en sus), 51 \$ US aux États-Unis et 59 \$ US dans les autres pays.

Pour commander, écrivez à : **Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6** ou communiquez avec le Centre de consultation de Statistique Canada le plus proche (la liste figure dans la présente publication).

Vous pouvez également composer sans frais le **1-800-267-6677** et porter votre achat à votre carte VISA ou MasterCard. Il est aussi possible de passer votre commande par **télécopieur** au **(613) 951-1584**.

THE MARKET RESEARCH HANDBOOK 1993/1994

1991 CENSUS INCLUDED

The fastest way to get off to a good start !

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The **Market Research Handbook** can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

Looking for...

... socio-economic and demographic profiles of 45 urban areas?

... revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all... and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7 % GST) in Canada, US\$113 in the United States and US\$132 in other countries.

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1993/1994

RECENSEMENT DE 1991

Pour partir du bon pied !

Des séances de remue-ménages jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil statistique des études de marché** peut vous faciliter les choix avant que vous n'engagiez plus de temps et de ressources à l'élaboration de votre stratégie.

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises qui les servent. Il vous aide à définir et situer vos marchés cibles.

Vous cherchez...

... des profils socio-économiques et démographiques de 45 régions urbaines ?

... des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le **Recueil** contient tout cela... et plus encore :

- données sur le recensement de 1991
- dépenses personnelles en biens et en services
- taille et composition des ménages et des familles
- traitements, salaires et emploi
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché** (n° 63-224 au catalogue) coûte 94 \$ (plus 7 % de TPS) au Canada, 113 \$ US aux États-Unis et 132 \$ US dans les autres pays.

Pour commander, veuillez écrire à Statistique Canada, Division du marketing, Vente des publications, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication).

Vous pouvez également commander par télécopieur au (613) 951-1584 ou composer sans frais le 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone: (1-613-951-3350) or to the Statistics Canada reference centre in:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.

- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Industrial Product Price Index

According to preliminary figures, manufacturers' prices in August were 6.4% higher than a year earlier. This annual rate is down slightly from the revised annual increase of 6.5% for July, but is still the second highest since mid-1982. After rising steadily through the first half of 1994, the annual rate has levelled off at a little over 6.0% for the latest three months. The increase in August was 0.6%, up slightly from the previous month.

The most important inflationary elements continued to be intermediate goods. First-stage intermediate goods prices stood 17.4% higher than a year earlier and second-stage intermediate goods prices stood 5.9% higher than a year earlier. The year-over-year change for finished goods was +3.5%, similar to what it has been for much of the latest 24 months.

Overall, the year-over-year change in Canadian producer prices was almost twice as high as the year-over-year price change in Italy (which has the next highest annual rate of producer price increases in the Group of Seven countries). There, the year-over-year change in producer prices has been running at between +3.0% and +3.6%.

Price increases in August continued to be widespread, though modest in most cases. Manufacturers saw prices rise in 14 major product groups and decline in five. The most significant price increases were for pulp, wood products and petroleum products. The declines included primary metal products. Although the month-to-month change in first-stage intermediate goods dropped somewhat, the price increases for second-stage intermediate goods and finished goods were all higher, particularly for second-stage intermediate goods and for foods and feeds.

Inflationary pressure remained strong in August, with overall producer prices 6.4% higher than a year earlier. Inflationary pressure continued to come principally from intermediate goods. Although there was some increase in the role of second-stage intermediate goods, the price increases in this sector were due to the strength of demand for those commodities and not due to increases in the prices of their inputs. While there were some price increases for finished goods, the year-over-year change in prices for capital equipment and for all other finished goods actually declined.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoire, les prix des fabricants en août sont en hausse de 6,4% par rapport à un an plus tôt. Ce taux d'une année à l'autre est légèrement inférieur à l'augmentation annuelle révisée de 6,5% pour juillet, mais il est le deuxième plus élevé depuis le milieu de 1982. Après une augmentation soutenue au premier semestre de 1994, le taux annuel s'est stabilisé à un peu plus de 6,0% au cours des trois derniers mois. La hausse de 0,6% en août est légèrement supérieure à celle du mois précédent.

Les principales sources de l'inflation sont encore les produits semi-finis. Les prix des produits semi-finis de première étape sont supérieurs de 17,4% à ceux d'un an plus tôt, ce pourcentage étant de 5,9% dans le cas des produits semi-finis de deuxième étape. Le taux de variation d'une année à l'autre dans le cas des produits finis est de +3,5%, semblable à celui observé pendant la plus grande partie des 24 derniers mois.

Dans son ensemble, le taux de variation d'une année à l'autre des prix des producteurs canadiens est presque deux fois supérieur à celui de l'Italie (qui enregistre le deuxième taux de variation annuel le plus élevé des prix des producteurs des autres pays membres du G-7, où le taux est compris entre +3,0% et +3,6%).

Les augmentations de prix en août sont encore très dispersées, mais modestes dans la plupart des cas. Les prix des fabricants augmentent dans quatorze groupes principaux et diminuent dans cinq, les hausses les plus appréciables touchant la pâte de bois, les produits du bois et les produits du pétrole. Les diminutions touchent notamment les produits de la première transformation des métaux. En dépit d'une certaine diminution du taux mensuel de variation des produits semi-finis de première étape, les hausses de prix pour les produits semi-finis de deuxième étape et les produits finis sont toutes plus importantes, en particulier pour les produits semi-finis de deuxième étape et les aliments de consommation et pour animaux.

Les pressions inflationnistes restent fortes en août. L'ensemble des prix à la production est en hausse de 6,4% par rapport à un an plus tôt. Ces pressions inflationnistes continuent d'émaner principalement des produits semi-finis. Même si les produits semi-finis de deuxième étape ont pris plus d'importance, la hausse des prix dans ce dernier cas s'explique par la vigueur de la demande pour ces produits et non pas par la majoration du prix des facteurs de production en cause. Même si le prix de certains produits finis s'est accru, les variations d'une année à l'autre du prix du matériel capitalisé et des autres produits finis, en fait diminuent.

Inflationary pressure on goods produced in Canada continues to be rooted in the strength of the demand for these items, much of it foreign in origin. There is not yet appreciable evidence that the price increases to this point are starting to force increases in the prices of other commodities. Conditions thus remain good for Canadian producers, while the Canadian consumer has yet to see any strong rise in the prices of consumer goods. The continuing strength of exports and investment together with a lack of strength in consumer spending suggest this may continue.

In August, both first-stage and second-stage intermediate goods contributed to the inflationary pressure on manufacturers' prices.

The most important price increases in the first-stage intermediate goods category were in woodpulp, particularly exported pulp. Other price increases in this group of commodities were aluminum and industrial chemicals.

Price increases of importance in the second-stage intermediate goods category included those for lumber, gasoline and fuel oil, and paper. Increased sales of magazine-quality Canadian paper resulted, in part, from an increase in demand due to growth in advertising associated with improved business conditions in North America. This was combined with reduced supply from Europe as European production was diverted to its own rising needs.

In August, the overall price level for all three types of finished goods rose. However, the year-over-year change in prices rose only for foods and feeds. It dropped for capital equipment and edged downward for all other finished goods.

The overall price level for foods and feeds rose 0.8% in August. This saw the year-over-year change in prices rise from +2.0% to +2.6%. The increases were mainly due to a jump in world coffee prices as reflected in the August CPI.

The year-over-year change in capital equipment prices dropped from +4.6% to +3.8% as prices rose only 0.1% in August. The drop in the year-over-year figure was principally due to the motor vehicle industry; prices for exports rose sharply in August 1993 as the U.S. dollar strengthened significantly then.

The year-over-year change in the prices for all other finished goods edged down by 0.1 points from +4.1% to +4.0% as August prices increased 0.4% over July. The August increases were principally the result of price increases for gasoline, paper, and some components of the automotive industry.

Les pressions inflationnistes sur les produits fabriqués au Canada sont encore causées par la demande, dont la plus grande partie est étrangère. On n'observe pas de preuve concrète encore que les hausses de prix jusqu'à présent commencent à susciter une augmentation du prix des autres marchandises. La situation reste donc bonne pour les producteurs canadiens, tandis que les consommateurs n'ont pas encore vu de hausse du prix des biens de consommation. La fermeté persistante des exportations et des investissements, de même que l'atonie des dépenses des consommateurs, semblent indiquer que cette situation se poursuivra.

En août, les produits semi-finis de première étape et de deuxième étape ont contribué à la pression inflationniste sur les prix des fabricants.

C'est le prix de la pâte de bois, en particulier celle destinée à l'exportation, qui augmente le plus dans la première catégorie. Les autres hausses de prix dans cette catégorie touchent l'aluminium et les produits chimiques industriels.

Dans la catégorie des produits semi-finis de deuxième étape, le prix du bois de construction, de l'essence et du mazout, ainsi que du papier, augmente fortement. La hausse des ventes de papier canadien de qualité pour les périodiques s'explique en partie par l'accroissement de la demande, résultant de la croissance de la publicité associée à l'amélioration du climat des affaires en Amérique du Nord. Il faut y ajouter la réduction des approvisionnements en provenance d'Europe, alors que la production européenne est détournée pour satisfaire l'augmentation de ses propres besoins.

En août, le niveau général des prix pour les trois types de produits finis augmente. Toutefois, le taux de variation d'une année à l'autre des prix ne s'accroît que pour les aliments de consommation et pour animaux. Il diminue dans le cas du matériel capitalisé et se replie pour tous les autres produits finis.

Le niveau d'ensemble des prix pour les aliments de consommation et pour animaux augmente de 0,8% en août, et le taux de variation d'une année à l'autre des prix passe ainsi de +2,0% à +2,6%. Ces augmentations sont attribuables principalement au bond des prix mondiaux du café, ce qui devait se refléter dans l'IPC d'août.

Le taux de variation d'une année à l'autre du prix du matériel capitalisé passe de +4,6% à +3,8%, car les prix ne s'accroissent que de 0,1% en août. Cette diminution est attribuable principalement au secteur des véhicules automobiles, dont les prix à l'exportation avaient beaucoup augmenté en août 1993, lorsque le dollar américain s'était fortement apprécié à ce moment-là.

Le taux de variation d'une année à l'autre du prix de tous les autres produits finis se replie de 0,1 point et passe de +4,1% à +4,0%, alors que les prix en août augmentent de 0,4% par rapport à juillet. En août, la hausse des prix est attribuable principalement à la majoration du prix de l'essence, du papier et de certaines composantes du secteur de l'automobile.

Pulp prices were up 4.5% in August. The export sector continued to be the strongest part of the market. The export price of sulphate woodpulp was up 3.9% compared to an increase of only 2.3% in the domestic prices. The 0.1% increase in the value of the U.S. dollar against the Canadian dollar contributed only marginally to this difference. There continued to be strong upward pressure on U.S. pulp prices because demand remained strong and pulp inventories have been run down.

Following a 3.0% decline in July, softwood lumber prices recovered 2.2% in August. Price increases ranged from +0.4% on the coast of British Columbia to +5.6% on the Prairies. Concern over the possibility of a strike in British Columbia helped strengthen softwood lumber prices across the country. Concern over British Columbia's labour situation also strengthened Canadian hardwood prices, while price increases of B.C. douglas fir stimulated increases in plywood prices.

Although crude oil prices dropped in August, gasoline and fuel oil prices continued to increase, rising by 2.6% over their July levels. These prices have increased 18.7% since January. Prices for other petroleum and coal products, however, moved down 0.6%. This category includes lubricating oils and greases, asphalt, and paraffin wax.

In August, the primary metal products index declined for the first time since September 1993, edging down by 0.1% from July 1994. The decline was primarily due to decreases in copper and nickel prices. The prices of both metals seem to have been affected by seasonal factors and Russian production. Overall primary metal prices, however, were still 16.7% higher than in August 1993.

Le prix de la pâte de bois s'accroît de 4,5% en août. Le secteur des exportations reste l'élément le plus vigoureux du marché. Le prix à l'exportation de la pâte de bois au sulfate augmente de 3,9%, comparativement à une hausse de 2,3% des prix intérieurs. La hausse de 0,1% de la valeur du dollar américain par rapport au dollar canadien n'intervient que de façon minime dans cette différence. Le prix américain de la pâte de bois reste soumis à de fortes pressions à la hausse, car la demande reste forte, tandis que les stocks de pâte de bois sont épuisés.

Après avoir baissé de 3,0% en juillet, le prix du bois de construction de résineux se redresse de 2,2% en août. Les hausses de prix sont comprises entre +0,4% sur la côte de la Colombie-Britannique et +5,6% dans les Prairies. Le risque d'une grève en Colombie-Britannique a contribué à raffermir le prix du bois de construction partout au pays. Les inquiétudes entourant la situation des relations de travail dans cette province ont également raffermi le prix du bois de feuillu canadien, tandis que la majoration du prix du sapin Douglas de la Colombie-Britannique stimulait la hausse du prix du contreplaqué.

En dépit d'une baisse du prix du pétrole brut en août, les prix de l'essence et du mazout poursuivent leur progression en août et dépassent ainsi de 2,6% leur niveau de juillet. Ces prix se sont accrus de 18,7% depuis janvier. Le prix des autres produits du pétrole et du charbon, par contre, se replie de 0,6%. Cette catégorie inclut les huiles et graisses de lubrification, l'asphalte et la paraffine.

En août, l'indice des produits de la première transformation des métaux diminue pour la première fois depuis septembre 1993 (-0,1%). Cette baisse s'explique principalement par le recul du prix du cuivre et du nickel, qui semble avoir été touché par des facteurs saisonniers et par la production russe. Dans l'ensemble, cependant, les prix de cette catégorie dépassent encore de 16,7% leur niveau d'août 1993.

Highlights

Raw Materials Price Index

Based on preliminary data raw material prices declined 1.0% from July to August. This was almost entirely due to the 7.0% decline in crude oil prices; excluding mineral fuels, other prices increased 1.2%. For crude oil and raw materials as a whole, this was the first decline in 1994. Year-over-year, raw material prices were up 9.4%. Almost all commodity group prices were up over the year; the exception was animals and animal products, whose prices declined a marginal 0.7%.

Crude oil prices fell 7.0% in August after having increased in every month since the beginning of the year. However, compared to six months earlier, crude oil prices were still up almost 32.0%.

Non-ferrous metal price increases slowed in August, as international inventories grew for some of these metals (i.e., nickel, copper, zinc). Gold prices were down 1.9% in August. Prices of most of the common base metals also fell, while some minor metals such as antimony and bismuth were subject to significant price increases because of supply problems in China.

Wood prices continued to edge upward, rising 1.0% in August. Wood prices have risen steadily in 1994, and were up 7.2% from last August. The main increases have been for pulpwood, driven by greater demand in the pulp industry. Since May, pulpwood prices were up 6.4%, whereas prices for logs and bolts have risen only 1.1%.

Vegetable product prices increased 2.2% in August, led by higher prices for green coffee and wheat. After falling almost 18.0% in the latest two months, wheat prices increased 3.5% in August. Russia and Australia have revised their wheat harvest forecasts downward because of drought. Also affected by weather were green coffee prices in Brazil, as frosts destroyed almost 40.0% of their next year's crop. Since Brazil is the world's largest coffee producer, their expected drop in supply has led to significant upward pressure on coffee prices.

Ferrous material prices continued to rise in August, up 5.2% from July. This was mainly due to a 10.4% increase for iron and steel scrap prices. Year-over-year iron and steel scrap prices increased 22.4%. As noted last month, the iron and steel scrap market remains very tight and competitive. Purchasers from Canada, the United States, and offshore continue to compete for the available scrap material.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, les prix des matières brutes ont diminué de 1,0% de juillet à août. Ce fléchissement s'explique presque entièrement par la chute de 7,0% des prix du pétrole brut. À l'exception des combustibles minéraux, les autres prix ont augmenté de 1,2%. En ce qui concerne le pétrole brut et les matières brutes dans l'ensemble, il s'agit de la première baisse en 1994. Les prix des matières brutes d'une année à l'autre ont progressé de 9,4%. Les prix de tous les groupes de produits ont monté au cours de l'année, sauf ceux des animaux et des substances animales qui ont fléchi très légèrement de 0,7%.

Les prix du pétrole brut ont tombé de 7,0% en août après avoir monté chaque mois depuis le début de l'année. Toutefois, comparativement à son niveau d'il y a 6 mois, les prix du pétrole brut étaient encore supérieurs de presque 32,0%.

Les hausses des prix des métaux non ferreux ont ralenti en août, les stocks internationaux ayant augmenté pour certains de ces métaux (c.-à-d. le nickel, le cuivre, le zinc). En août, les prix de l'or ont baissé de 1,9%. Les prix des principaux métaux communs ont également diminué, alors que certains métaux accessoires, soit l'antimoine et le bismuth, ont subi d'importantes augmentations de prix en raison des problèmes d'approvisionnement en Chine.

Les prix du bois ont continué de monter lentement, affichant une hausse de 1,0% en août. Ils ont augmenté régulièrement en 1994 et dépassent de 7,2% ceux du mois d'août 1993. Le bois à pâte a connu les principales augmentations occasionnées par la demande accrue de l'industrie des pâtes. Depuis mai, les prix du bois à pâte ont été majorés de 6,4%, alors que ceux des billes et billots n'ont progressé que de 1,1%.

Les prix des substances végétales se sont accrus de 2,2% en août en raison principalement de la hausse des prix du café vert et du blé. Après avoir diminué de près de 18,0% au cours des deux derniers mois, les prix du blé ont augmenté de 3,5% en août. La Russie et l'Australie ont révisé à la baisse leurs prévisions des moissons de blé en raison de leurs conditions de sécheresse. Les prix du café vert ont également été touchés par les conditions climatiques au Brésil, les gelées ayant détruit presque 40,0% de ses récoltes de l'an prochain. Puisque le Brésil est le plus grand producteur de café au monde, la baisse prévue des approvisionnements dans ce pays a entraîné d'importantes pressions à la hausse sur les prix du café.

Les prix des matières ferreuses ont continué de progresser en août, s'établissant à 5,2% de plus qu'en juillet. Cette montée est surtout attribuable à la hausse de 10,4% des prix des déchets de fer et d'acier. Les prix d'une année à l'autre des déchets de fer et d'acier ont augmenté de 22,4%. Comme il a été noté le mois dernier, le marché des déchets de fer et d'acier demeure très serré et concurrentiel. Les acheteurs canadiens, américains et d'outre-mer continuent de se faire concurrence pour les déchets disponibles.

6	Raw materials - Total - Ensemble des matières brutes	123.9	125.2	-1.0	2.2	9.4
	Raw materials - Total - Excl. mineral fuels - Ensemble des matières brutes, sauf combustibles minéraux	131.1	129.6	1.2	1.6	5.0
	Vegetable products - Substances végétales	112.6	110.2	2.2	-3.3	14.3
	Animals & animal products - Animaux & substances animales	109.2	108.1	1.0	-0.5	-0.7
	Wood - Bois	204.7	202.6	1.0	2.0	7.2
	Ferrous material - Matières ferreuses	118.6	112.7	5.2	2.1	13.0
	Non-ferrous metals - Métaux non ferreux	123.7	123.4	0.2	9.1	29.5
	Non metallic minerals - Minéraux non métalliques	103.4	103.6	-0.2	-0.4	4.6
	Mineral fuels - Combustibles minéraux	108.4	116.0	-6.6	3.7	10.4

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(2) Ces indices sont provisoires.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing
 TABLEAU 4. Indices des prix des produits industriels par étape de transformation

1986 = 100

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitué recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

**ELECTRIC POWER SELLING PRICE
INDEXES (NON-RESIDENTIAL),
1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

**INDICES DES PRIX DE VENTE DE L'ÉNERGIE
ÉLECTRIQUE (NON RÉSIDENTIELLE),
1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Robin Lowe (613-951-3370), or Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec la Sous-section de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Robin Lowe (613-951-3370) ou Bernard Lupien (613-951-9605).

THE 1994 CANADA YEAR BOOK

*Your indispensable and
comprehensive reference
source on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

- ▶ Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives
- ▶ 250 concise tables plus 63 charts and graphs that put statistical information into focus
- ▶ Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- ▶ Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

L'ANNUAIRE DU CANADA 1994

*Un ouvrage complet et
indispensable sur le Canada*

Pour obtenir des renseignements essentiels sur le Canada, consultez *l'Annuaire du Canada*. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

L'Annuaire du Canada 1994 étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

Voici ce que vous trouverez dans l'édition de 1994 :

- ▶ Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne
- ▶ 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique
- ▶ Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres
- ▶ Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, *l'Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

COMMANDEZ DÈS AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

Vous pouvez vous procurer la version française ou anglaise de *l'Annuaire du Canada 1994* (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

MERCI DE VOTRE COMMANDE!

Statistics
Canada

Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts. Names and phone numbers of the experts who can help solve your particular research problem or find specialized data are listed with articles and features.

You'll also receive a complimentary copy of CEO's annual **Historical Statistical Supplement**. Sixty years of historical perspectives right at your fingertips – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue number 10-230) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries.

To order, write: Statistics Canada
Marketing Division
Sales and Service
Ottawa, Ontario, K1A 0T6

or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, l'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter l'OEC dans son format actuel en deux parties, qui a été bien accueillie. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, les problèmes, les tendances et les développements. **L'aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter l'OEC?

En tant qu'abonné à l'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada. Le nom et le numéro de téléphone des experts qui peuvent vous aider à résoudre vos problèmes particuliers de recherche ou trouver des données spécialisées sont cités dans les articles et les rubriques de l'OEC.

Vous recevrez également un exemplaire gratuit du **Supplément statistique historique** annuel. Vous aurez ainsi devant vous soixante années de données rétrospectives et ce, à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-230 au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays.

Pour commander, écrivez à : Statistique Canada
Division du marketing
Vente et service
Ottawa (Ontario) K1A 0T6

ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

THE MARKET RESEARCH HANDBOOK 1993/1994

1991 CENSUS INCLUDED

The fastest way to get off to a good start !

Brainstorming with your colleagues produces some great marketing ideas. But which ones will you use? The **Market Research Handbook** can help you narrow your options before you commit any more time and resources to developing your strategy.

This handbook is the most comprehensive statistical compendium on Canadian consumers and the businesses that serve them. It helps you to identify, define and locate your target markets.

Looking for...

... socio-economic and demographic profiles of 45 urban areas?

... revenue and expenditure data for retailers and small businesses?

The **Market Research Handbook** has it all... and more. It provides information on:

- 1991 Census information
- personal expenditures on goods and services
- size and composition of households and families
- wages, salaries and employment
- investment in Canadian industries
- labour force in various industries
- industry and consumer prices

It has been one of our bestsellers since 1977 for the simple reason that it offers such a range and depth of market data. Save time and money when you're looking for data or data sources, keep the **Market Research Handbook** close at hand for easy reference.

The **Market Research Handbook** (Cat. no. 63-224) is \$94 (plus 7 % GST) in Canada, US\$113 in the United States and US\$132 in other countries.

To order, write to Statistics Canada, Marketing Division, Publication Sales, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to (613) 951-1584. Or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

LE RECUEIL STATISTIQUE DES ÉTUDES DE MARCHÉ 1993/1994

RECENSEMENT DE 1991

Pour partir du bon pied !

Des séances de remue-ménings jaillissent d'excellentes idées de commercialisation. Mais lesquelles choisir ? Le **Recueil statistique des études de marché** peut vous faciliter les choix avant que vous n'engagiez plus de temps et de ressources à l'élaboration de votre stratégie.

Ce recueil statistique est le plus exhaustif qui soit sur les consommateurs canadiens et les entreprises qui les servent. Il vous aide à définir et situer vos marchés cibles.

Vous cherchez...

... des profils socio-économiques et démographiques de 45 régions urbaines ?

... des données sur les recettes et les dépenses de détaillants et de petites entreprises ?

Le **Recueil** contient tout cela... et plus encore :

- données sur le recensement de 1991
- dépenses personnelles en biens et en services
- taille et composition des ménages et des familles
- traitements, salaires et emploi
- investissements par secteur d'activité économique
- population active par secteur d'activité
- prix de l'industrie et de la consommation

Si c'est l'un de nos succès depuis 1977, c'est parce qu'il vous renseigne en long et en large sur le marché. Pour économiser temps et argent, vous ne sauriez vous en passer.

Le **Recueil statistique des études de marché** (n° 63-224 au catalogue) coûte 94 \$ (plus 7 % de TPS) au Canada, 113 \$ US aux États-Unis et 132 \$ US dans les autres pays.

Pour commander, veuillez écrire à Statistique Canada, Division du marketing, Vente des publications, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre de consultation de Statistique Canada le plus proche (voir la liste figurant dans la présente publication).

Vous pouvez également commander par télécopieur au (613) 951-1584 ou composer sans frais le 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinales et le système d'extraction de Statistique Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

Highlights

Industrial Product Price Index

According to preliminary figures, September prices of exporting producers continued to rise, while inflationary pressures on consumers did not increase. The year-over-year change in producer prices remained at over 6% for the fourth consecutive month.

Inflationary pressure on prices paid to some sectors of manufacturers remained strong in September. Consumers are not likely to feel the full impact of the rise in prices paid to manufacturers because export demand is behind much of the pressure. However, the profit figures of exporters are likely to continue to benefit.

The year-over-year change in the IPPI edged down to 6.2% as prices slipped 0.2% from their August level. Exchange rate movements were an important contributor to this change. Since June, the year-over-year change in manufacturers' prices has been higher than at any time since mid 1982.

At the manufacturer's level, the year-over-year price increase for consumer goods was about 2.4% in September. This excludes the immediate effects of changes in the value of the Canadian dollar abroad. The year over year change in the good's component of the CPI was a little under 1.5%. This excludes the effect of the drop in tobacco taxes in Eastern Canada. Manufacturers receive about half of the consumer's dollar. The remainder goes to retailers, wholesalers, transportation companies, and taxes. Over the last year, the consumer market remained relatively weak. It seems part of the increase in manufacturers' prices was absorbed by wholesalers and retailers as they tried to hold down labour and other costs.

The year-over-year change in manufacturers' prices in Canada remained much higher than in other G7 countries. It was about double the increase in Italy, the country with the next highest year-over-year change. It was about triple the increase in the United States, Germany, and the United Kingdom. Important contributors to the differences were the structure of the Canadian economy and the effect of changes in the Canadian exchange rate.

Inflationary pressure on the prices of certain intermediate goods (such as pulp and primary metals used to produce other goods) remained strong in September. There was some easing, however, in other intermediate goods' prices. Increases in this sector generally came from the strength of demand for those commodities, not from the rising costs of

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoires, les prix des producteurs de biens d'exportation pour septembre ont continué de progresser, tandis que la pression inflationniste sur les prix à la consommation n'a pas augmenté. La variation d'une année à l'autre des prix des producteurs est demeurée supérieure à 6% pour un quatrième mois consécutif.

La pression inflationniste sur les prix payés à certains secteurs de la fabrication est demeurée forte en septembre. Les consommateurs canadiens ne devraient pas ressentir les conséquences de cette hausse des prix des fabricants car la demande à l'exportation explique en plus grande partie la pression. Cependant, les profits des exportateurs devraient continuer de croître.

La variation d'une année à l'autre de l'IPPI a légèrement diminué pour s'établir à 6,2%, les prix ayant régressé de 0,2% par rapport au niveau observé en août. Les mouvements du taux de change ont largement contribué à cette variation. Depuis juin, la variation d'une année à l'autre des prix des fabricants a été supérieure à tout niveau observé depuis le milieu de 1982.

En ce qui concerne les fabricants, la hausse d'une année à l'autre des prix des biens de consommation a atteint environ 2,4% en septembre. On exclut ici les effets immédiats de la variation du dollar canadien sur les marchés étrangers. La variation d'une année à l'autre de la composante des biens de l'IPC est légèrement inférieure à 1,5%, si l'on exclut l'incidence de la baisse des taxes sur le tabac dans l'est du Canada. Les fabricants reçoivent environ la moitié du dollar payé par le consommateur. Le reste va aux détaillants, aux grossistes, aux sociétés de transport et sous forme de taxes. Au cours de l'année écoulée, le marché des biens de consommation est demeuré relativement faible. Il semble qu'une partie de la croissance des prix des fabricants ait été absorbée par les grossistes et les détaillants qui tentaient de maintenir les coûts de la main d'oeuvre et d'autres coûts.

La variation d'une année à l'autre des prix des fabricants au Canada est demeurée de beaucoup supérieure à celle d'autres pays industrialisés du Groupe des Sept. Elle était à peu près deux fois plus élevée que la hausse observée en Italie, qui a affiché la variation la plus élevée après le Canada. Elle était environ trois fois supérieure à celle des États Unis, de l'Allemagne et du Royaume-Uni. En guise de facteurs ayant le plus contribué à ces variations, mentionnons la structure de l'économie canadienne et les effets de la variation du taux de change du dollar canadien.

La pression inflationniste sur les prix de certains produits semi-finis (des biens, comme la pâte de bois et les produits métalliques primaires, qui servent à produire d'autres biens) est demeurée forte en septembre. On a observé toutefois un certain ralentissement pour d'autres produits semi-finis. Les hausses de prix dans ce secteur étaient généralement attribuables à la vigueur de la demande pour ces produits, et

their materials. Even so, prices received by manufacturers for the main categories of finished goods (foods and feeds, capital equipment, and other finished goods) moved down.

Much of the inflationary pressure on intermediate goods produced in Canada remains foreign in origin. There is no appreciable evidence yet that input price increases are starting to force increases in prices of other commodities. Thus, conditions remain good for Canadian producers, while the Canadian consumer has yet to see any strong rise in prices of consumer goods. The continuing strength of exports and investment, together with the lack of any widespread increase in consumer spending, suggests this may continue.

The most important price increases among intermediate goods were for non ferrous primary metal products, woodpulp, and paper. Only for one category of paper was the price increase rooted in supply costs rather than in increasing world demand. Offsetting the increases were declines in the prices for lumber and other wood products, motor vehicle parts, and petroleum products.

The downward movement of prices for finished goods were driven mainly by the strengthening Canadian dollar, which appeared to reduce the value of export prices for motor vehicles quoted in U.S. dollars. It was supported by a reduction in the prices for petroleum products, some industrial machinery, meat, and some electrical products.

September's 1.9% rise in the value of the Canadian dollar against the U.S. dollar was primarily responsible for the 0.2% decline in manufacturers' prices because it reduced the value of export prices quoted in U.S. dollars. Producer prices declined in six major product groups but rose in 13 others. The most significant price declines were for exported motor vehicles, lumber and other wood products, and petroleum products. Partly offsetting the declines were increases in non ferrous primary metal products and in pulp and paper.

Declines in the prices received for exported automobiles (-1.8%) and exported trucks (-1.9%) were almost entirely due to the effect of the rise in the value of the Canadian dollar.

The change in the value of the Canadian dollar contributed to the fall in prices received for wood products. However, recent labour settlements in British Columbia were responsible for a large part of the decline in wood product prices.

A 6% decline in crude oil prices in August, followed by September's 7% decline, led to a 1.7% decline in September's gasoline and fuel prices.

non à la progression des coûts des matières. Les prix payés aux fabricants pour les principales catégories de produits finis (aliments de consommation et aliments pour animaux, matériel capitalisé et autres produits finis) ont régressé.

Une grande partie de la pression inflationniste sur les produits semi-finis fabriqués au Canada a continué d'être d'origine essentiellement étrangère. On n'observe pas de preuve concrète bien que les hausses de prix de ces produits commencent à susciter une augmentation du prix des autres marchandises. La situation est donc restée bonne pour les producteurs canadiens; pour sa part, le consommateur canadien n'a pas encore vu de hausse considérable des prix des biens de consommation. La fermeté persistante des exportations et des investissements, de même que l'atonie des dépenses des consommateurs en général, semblent indiquer que cette situation se poursuivra.

Parmi les produits semi-finis, ce sont les produits métalliques primaires non ferreux, la pâte de bois et le papier qui ont affiché les augmentations de prix les plus importantes. Dans une seule catégorie de papier, ce sont les coûts des matières et non l'accroissement de la demande mondiale qui ont causé la montée des prix. Celle-ci a été atténuée par un fléchissement des prix des sciages et d'autres produits de bois, des pièces de véhicules automobiles et des produits pétroliers.

Le mouvement à la baisse des prix des produits finis découlait principalement de la vigueur du dollar canadien, ce qui semblait réduire la valeur des prix à l'exportation des véhicules automobiles exprimés en dollars américains. Il faut y ajouter la réduction des prix des produits pétroliers, de certaines machines industrielles, de la viande et de certains produits électriques.

La chute de 0,2% des prix des fabricants était surtout attribuable à la hausse de 1,9% de la valeur du dollar canadien par rapport au dollar américain en septembre, ce qui a eu pour effet de réduire la valeur des prix à l'exportation exprimés en dollars américains. Les prix des producteurs ont régressé dans six grands groupes de produits, tandis qu'ils se sont accrus dans treize autres. Les plus fortes diminutions ont touché les véhicules automobiles exportés, les sciages et d'autres produits du bois, et les produits pétroliers. Ces reculs ont été en partie atténués par une progression des prix des produits métalliques primaires non ferreux, de la pâte de bois et du papier.

Les baisses des prix des voitures exportées (-1,8%) et des camions exportés (-1,9%) étaient presque entièrement attribuables à l'appréciation du dollar canadien.

La variation de la valeur du dollar canadien a contribué à faire fléchir les prix des produits du bois. Cependant, les récents règlements syndicaux négociés en Colombie-Britannique sont à l'origine, principalement, de la chute des prix des produits du bois.

Le recul de 6% des prix du pétrole brut observé en août, qui a été suivi par une baisse de 7% en septembre, a amené une diminution de 1,7% des prix de l'essence et du carburant en septembre.

Price increases for non ferrous primary metal products were widespread. Copper and copper alloy product prices jumped 5.5% as world demand for copper continued to rise. Aluminum product prices also rose and were 1.0% higher than in August. The price for nickel products was up 2.3%, which may be due in part to the amount of nickel held by investors waiting for higher prices.

Domestic prices for sulphate woodpulp rose 1.9%, while export prices for sulphate woodpulp jumped 2.3%. Demand is rising both at home and abroad for woodpulp, and exports are strong.

Paper prices were up 0.1%, led by a 2.4% increase in the price of fine paper, which was partly offset by a decline in newsprint prices that was an effect of movement in the exchange rate. Overall, the demand for paper was strong as were exports. However, manufacturers reported that increased material prices were responsible for the increase in the domestic price of paper (other than newsprint) used for printing.

Les hausses des prix des produits métalliques primaires non ferreux ont été généralisées. Les prix des produits du cuivre et des alliages de cuivre ont bondi de 5,5%, la demande mondiale de cuivre ayant continué de croître. Les prix des produits de l'aluminium se sont accrus également pour dépasser de 1,0% ceux enregistrés en août. Les prix des produits du nickel ont grimpé de 2,3%; cette croissance est attribuable en partie aux stocks de nickel détenus par les investisseurs en attente d'une hausse des prix de ce produit.

Les prix domestiques de la pâte de bois au sulfate ont augmenté de 1,9%, tandis que les prix à l'exportation de ce produit ont bondi de 2,3%. On observe une croissance de la demande au Canada et à l'étranger pour la pâte de bois. Par ailleurs, les exportations sont demeurées élevées.

Les prix du papier se sont accrus de 0,1%, sous l'effet de la progression de 2,4% des prix du papier fin, mais ont été quelque peu atténués par le recul des prix du papier journal causé par le mouvement du taux de change. Dans l'ensemble, la demande pour le papier était élevée; c'était également le cas des exportations. Toutefois, les fabricants ont déclaré que les hausses des prix des matériaux étaient à l'origine des augmentations du prix domestique du papier, autre que le papier journal, utilisé pour l'impression.

Highlights

Raw Materials Price Index

Based on preliminary data, raw material prices continued downward in September. Price declines in crude oil and other commodities reduced the upward pressure on prices at the manufacturing level.

Raw material prices fell 2.2% from August, but were still 8.1% higher than a year earlier. Leading the decline was crude oil. Also contributing were lower prices for live hogs and cattle, oilseeds, and wood. Higher prices for grains and many metals, particularly copper and aluminum, partly offset the overall decline.

Crude oil prices, which had been increasing since the start of the year, declined for a second consecutive month in September. Prices increased almost 44% since the end of 1993 up to July. The downward trend of the latest two months may not continue much longer if demand rises as expected this fall and winter while OPEC's current supply controls remain in place.

Prices for live hogs and cattle have been declining since May, and fell more sharply in September. Supply of live hogs and cattle are up, and, with the reluctance to carry them over the winter, there has been downward pressure on prices.

Wood prices in September edged down slightly for the first time since October 1993. Wood prices have increased significantly since the start of 1992; but the rate of increase has slowed in recent months, and the upward pressure may have ended. Even so, it will be months before the effects of recent and on going labour settlements, increased overhead costs associated with higher stumpage fees, and policies to control cutting procedures in Canada's forests are fully realised.

Although they showed no overall change in September, vegetable product prices were still 20.3% higher than a year earlier. In September higher grain prices (wheat +6% and barley +11%) were offset by lower prices for oilseeds (canola -2% and soybeans -9%). The Canadian Wheat Board's asking export price for No. 1 grade increased from US\$176 per tonne in August to US\$187 per tonne in mid September. Wheat prices appear to be strengthening for 1994-95, due to tight world supply conditions and a low stock inventory predicted for next summer. Prices for oilseeds have fallen almost 25% since June; however, even with the current bumper crop for canola and soybeans, the demand from countries such as China and Japan for oilseed products may put upward pressure on oilseed prices in the future.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, les prix des matières brutes ont continué de régresser en septembre. Les reculs des prix du pétrole brut et d'autres produits ont atténué le mouvement à la hausse des prix des produits manufacturés.

Les prix des matières brutes ont diminué de 2,2% par rapport au mois d'août, mais demeurent de 8,1% supérieurs au niveau observé un an plus tôt. Le pétrole brut a été le principal facteur de ralentissement. Les porcs et les bovins vivants, les oléagineux et le bois ont également contribué au fléchissement des prix. La hausse des prix de nombreux métaux, plus particulièrement le cuivre et l'aluminium, et des céréales a atténué en partie la baisse générale.

Les prix du pétrole brut, qui augmentaient depuis le début de l'année, ont accusé une diminution en septembre pour un deuxième mois consécutif. Les prix se sont accrus de près de 44% entre la fin de 1993 et le mois de juillet. Le mouvement à la baisse inscrit au cours des deux derniers mois ne devrait pas se poursuivre bien longtemps, si la demande prévue pour l'automne et l'hiver se réalise et si le contrôle actuel qu'exerce l'OPEP sur l'approvisionnement demeure en vigueur.

Les prix des porcs et des bovins vivants régressent depuis mai et ont chuté davantage en septembre. Les approvisionnements de porcs et de bovins vivants se sont accrus; l'hésitation à les maintenir pendant l'hiver a eu pour effet de faire tomber les prix.

En septembre, les prix du bois ont légèrement fléchi pour la première fois depuis octobre 1993. Les prix pour ce produit ont progressé considérablement depuis le début de 1992, mais le taux de croissance s'est ralenti au cours des derniers mois; aussi le mouvement à la hausse peut avoir été interrompu. Cependant, il faudra des mois avant que l'on ressente pleinement les effets des règlements salariaux récents et actuels, de la hausse des frais généraux associée à l'augmentation des droits de coupe et aux politiques de réglementation de l'abattage aux forêts canadiennes.

Bien qu'ils n'aient affiché aucune variation globale en septembre, les prix des préparations à base de légumes sont demeurés de 20,3% supérieurs à ceux observés un an plus tôt. En septembre, la progression des prix des céréales (blé, +6%; orge, +11%) a été atténuée par la régression des prix des graines oléagineuses (canola, -2%; soja, -9%). Le prix à l'exportation exigé par la Commission canadienne du blé de catégorie 1 s'est accru pour passer de 176\$US la tonne en août à 187\$US à la mi septembre. Les prix du blé semblent remonter la pente pour 1994-1995 en raison du resserrement des approvisionnements mondiaux et de la baisse des stocks prévue pour l'été prochain. Les prix des oléagineux ont chuté de près de 25% depuis juin; toutefois, malgré la récolte exceptionnelle actuelle de canola et de soja, la demande de oléagineux émanant de pays comme la Chine et le Japon pourrait exercer à l'avenir une pression à la hausse sur les prix nationaux des graines oléagineuses.

The only group of commodities for which prices rose in September was non ferrous metals, which have been on an upward trend since December 1993. September prices were up over 4%. Led by increased demand for copper in the G7 countries, copper prices moved upward more than 7%. Also, aluminum prices increased to their highest level since September 1990; inventories have fallen almost 10% since June.

Raw material prices in September declined 2.2% from a month earlier, and overall prices excluding mineral fuels fell 0.5%. On a year-over-year basis, raw material prices were up 8.1%, and overall prices excluding mineral fuels rose 9.6%.

Le seul groupe de marchandises qui a progressé en septembre est celui des métaux non ferreux, qui affiche une tendance à la hausse depuis décembre 1993. En septembre, les prix se sont accrus de plus de 4%. Sous l'effet de l'augmentation de la demande de cuivre émanant du Groupe des Sept, les prix de ce produit ont grimpé de plus de 7%. De même, les prix de l'aluminium ont bondi pour atteindre le niveau le plus élevé depuis septembre 1990, les stocks ayant diminué de près de 10% depuis juin.

En septembre, les prix des matières brutes ont accusé un recul de 2,2% par rapport au mois précédent. Dans l'ensemble, les prix pour ces matières, à l'exclusion des combustibles minéraux, ont fléchi de 0,5%. D'une année à l'autre, les prix des matières brutes ont affiché une croissance de 8,1%; dans l'ensemble, les prix pour ces matières, à l'exclusion des combustibles minéraux, ont augmenté de 9,6%.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E+S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E+S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).
